Elsevier Immunology Journals with current openings

Positions

- (Co-)Editor-in-Chief
- Executive Editor

Positions

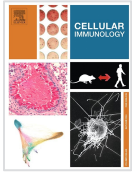

- Associate Editor
- Editorial Board Member

Positions

- Associate Editor

(Co-)Editor-in-Chief for Cellular Immunology

About the journal

Cellular Immunology publishes original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal encompasses the broad area of in vitro and in vivo studies of cellular immune responses. The journal publishes, under the hybrid model, over 60 articles annually and its 2023 Impact Factor is 3.7.

Ideal Candidates

We are seeking candidates who are active researchers with a strong reputation in the field of cellular immunology. Ideal applicants should be well-connected within the international immunology community, have prior editorial experience in peer-reviewed journals, and demonstrate sound scientific judgment. They should also be capable of leading and inspiring a team of over six editors.

Responsibilities

The (Co-)Editor-in-Chief will oversee the editorial processes, and his/her responsibilities include, but are not limited to:

- Article triage: Evaluate manuscript submissions in a timely manner and assign them to handling editors
- Ethical case management: Address and resolve ethical issues in accordance with journal policies and standards
- New editor recruitment: Together with the journal publisher, identify and recruit qualified editors to enhance the editorial team and broaden expertise
- Editorial office collaboration: Work closely with the editorial office to streamline operations and improve overall journal efficiency

Timeline

The successful candidate will start his/her role on May 1st 2025. The preferred duration for the term is at least 3 years.

Remuneration and Benefits

This position offers an annual remuneration, which will be discussed with successful applicants, and the opportunity to engage with one of the largest and most reputable academic publishers, gaining insights into new discoveries and research projects.

Application Process

We invite interested candidates to submit their Curriculum Vitae along with a letter of interest that articulates their vision for the future of the journal.

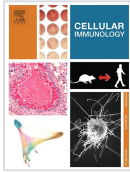

This letter should specifically address the following key areas:

- Strategies to enhance the quality of submissions from diverse geographic regions
- Initiatives to promote inclusion and diversity within the journals

Please send your applications before 31st March 2025 to Stefano Coppola, Senior Publisher, at s.coppola@elsevier.com

We welcome applications from candidates worldwide, as we value diverse perspectives in our editorial team.

Executive Editor for Cellular Immunology

About the journal

Cellular Immunology publishes original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal encompasses the broad area of in vitro and in vivo studies of cellular immune responses. The journal publishes, under the hybrid model, over 60 articles annually and its 2023 Impact Factor is 3.7.

Ideal Candidates

We are seeking candidates who are active researchers with a strong focus on immunodevelopment, myeloid cells, innate immunity, tissue-resident immunity, T cell immunology, immune cell signaling, and immunotherapy. Ideal applicants should be well-connected within the international (cellular) immunology community, have prior editorial experience in peer-reviewed journals, and demonstrate sound scientific judgment.

Responsibilities

The Executive Editor will oversee the editorial processes, and his/her responsibilities include, but are not limited to:

- Manage Peer-Review: Initiate and supervise the peer-review process in a timely manner
- Special Issue Development: Together with the journal publisher, identify prominent topics and outstanding researchers for Special Issues
- Editorial office collaboration: Work closely with the editorial office to streamline operations and improve overall journal efficiency

Timeline

The successful candidate will start his/her role as soon as possible. The preferred duration for the term is at least 2 years.

Remuneration and Benefits

This position offers an annual remuneration, which will be discussed with successful applicants, and the opportunity to engage with one of the largest and most reputable academic publishers, gaining insights into new discoveries and research projects.

Application Process

We invite interested candidates to submit their Curriculum Vitae along with a letter of interest that articulates a list of hot topics and top-notch researchers for a pipeline of Special Issues.

Please send your applications before 31st March 2025 to Stefano Coppola, Senior Publisher, at s.coppola@elsevier.com

We welcome applications from candidates worldwide, as we value diverse perspectives in our editorial team.

Associate Editor for Molecular Immunology

About the journal

Molecular Immunology publishes research focused on the cellular, biochemical, and genetic mechanisms underlying immunological phenomena. The journal covers studies on all model organisms, from invertebrates to humans, and topics such as infection, autoimmunity, immunodeficiencies, inflammation, and tumor immunology. The journal publishes under a hybrid model, with a 2023 Impact Factor of 3.2.

Ideal Candidates

We are seeking active researchers in molecular immunology with a focus on infection, autoimmunity, transplantation, immunodeficiencies, inflammation, tumor immunology, and related fields. Ideal applicants should be well-connected within the international immunology community, have prior editorial experience in peer-reviewed journals, possess knowledge in publishing ethics, and demonstrate sound scientific judgment.

Responsibilities

The Associate Editor will oversee the editorial processes, and his/her responsibilities include, but are not limited to:

- Manage Peer-Review: Initiate and supervise the peer-review process in a timely manner
- Special Issue Development: Together with the journal publisher, identify prominent topics and outstanding researchers for Special Issues
- Editorial office collaboration: Work closely with the editorial office to streamline operations and improve overall journal efficiency

Timeline

The successful candidate will start his/her role as soon as possible. Initial term of 1 year, with potential of renewal based on interest and engagement with the journal

Remuneration and Benefits

This position offers an annual remuneration, which will be discussed with successful applicants, and the opportunity to engage with one of the largest and most reputable academic publishers, gaining insights into new discoveries and research projects.

Application Process

We invite interested candidates to submit their Curriculum Vitae along with a Cover Letter. Please send your applications before 30th April 2025 to Yanan Li, Publisher, at yanan.li@elsevier.com

We welcome applications from candidates worldwide, as we value diverse perspectives in our editorial team.

Editorial Board Member for Molecular Immunology

About the journal

Molecular Immunology publishes research focused on the cellular, biochemical, and genetic mechanisms underlying immunological phenomena. The journal covers studies on all model organisms, from invertebrates to humans, and topics such as infection, autoimmunity, immunodeficiencies, inflammation, and tumor immunology. The journal publishes under a hybrid model, with a 2023 Impact Factor of 3.2.

Ideal Candidates

We are seeking PhD students, postdoctoral researchers, and junior faculty members with a research focus on molecular immunology, particularly in the areas of infection, autoimmunity, transplantation, immunodeficiencies, inflammation, tumor immunology, and related fields. Basic experience with the peer-review process and knowledge of publishing ethics are required.

Responsibilities

The Editorial Board Member (EBM) will be involved in various editorial activities, including but not limited to:

- Reviewing Manuscripts: EBMs are expected to review approximately five manuscripts per year when invited by the Editors, providing constructive feedback to help maintain our high standards of quality.
- Submitting Articles: EBMs are encouraged to submit their own articles as the main author and facilitate submissions from their network or institution.
- Special Issue: EBMs are invited to identify prominent topics and outstanding researchers and may act as Guest Editors for Special Issues.

Timeline

The successful candidate will start his/her role as soon as possible. Initial term of 1 year, with potential of renewal based on interest and engagement with the journal.

Remuneration and Benefits

This position not only allows you to contribute to the scientific community but also offers valuable professional development and networking opportunities, while enhancing your professional profile by being listed on the journal's Editorial Board section. Please note that this role does not come with remuneration.

Application Process

We invite interested candidates to submit their Curriculum Vitae along with a Cover Letter. Please send your applications before 30th April 2025 to Yanan Li, Publisher, at yanan.li@elsevier.com

We welcome applications from candidates worldwide, as we value diverse perspectives in our editorial team.

Associate Editor for International Immunopharmacology

About the journal

International Immunopharmacology publishes original research papers in the areas of immunology, pharmacology, cytokine biology, immunotherapy, immunopathology, and immunotoxicology. The journal welcomes clinical, pre-clinical, and in vitro studies on immunotherapy, pharmacological agents, and their mechanisms of action. The journal publishes under the hybrid model and its 2023 Impact Factor is 4.8.

Ideal Candidates

We are seeking active researchers in immunology, pharmacology, immunotherapy, immunopathology, immunotoxicology, and cytokine biology and related fields. Ideal applicants should be well-connected within the international immunology or pharmacology community, have prior editorial experience in peer-reviewed journals, possess knowledge in publishing ethics, and demonstrate sound scientific judgment.

Responsibilities

The Associate Editor will oversee the editorial processes, and his/her responsibilities include, but are not limited to:

- Manage Peer-Review: Initiate and supervise the peer-review process in a timely manner
- Special Issue Development: Together with the journal publisher, identify prominent topics and outstanding researchers for Special Issues
- Editorial office collaboration: Work closely with the editorial office to streamline operations and improve overall journal efficiency

Timeline

The successful candidate will start his/her role as soon as possible. Initial term of 1 year, with potential of renewal based on interest and engagement with the journal

Remuneration and Benefits

This position offers an annual remuneration, which will be discussed with successful applicants, and the opportunity to engage with one of the largest and most reputable academic publishers, gaining insights into new discoveries and research projects.

Application Process

We invite interested candidates to submit their Curriculum Vitae along with a Cover Letter. Please send your applications before 30th May 2025 to Yanan Li, Publisher, at yanan.li@elsevier.com

We welcome applications from candidates worldwide, as we value diverse perspectives in our editorial team.
